

NEW STRONGER DOMEHOUSE : FIBER POLE AND TIE DOWN DIAGRAM

DomeHouse set-up

Step 1. Unpack FlowerHouse and accessories.

Step 2. Take fiberpoles out of pack and assemble completely. You will have two equal length poles.

Step 3. Grab the center of any hub and pull the strap out until the wall "pops" out.

Step 4. Repeat this step, moving around the DomeHouse until all the walls are "popped" out.

Step 5. Insert the door support fiberpoles into the floor pocket sewn next to the door. Insert the top of the pole into the pocket sewn directly above.

Step 6. Stake Greenhouse in place and install high wind tie downs.

Fold Up and Storage Instructions

Although sizes differ dramatically the folding technique remains the same for these greenhouses.
(Helpful hint for best results be sure greenhouse is clean and dry prior to putting in storage / carry bag, use mild dish soap rinsed well then air dry is recommended.)

1. Remove all of the following where applicable, Shade Cloth, Tent Stakes, Fiber Poles and store them in the storage bag that they came in.
(helpful hint do not put accessories storage bags into main storage pack until greenhouse is fully packed and fit)

2. Fold your Flowerhouse from two panels into one as shown in figure A.
(helpful hint tuck excess material in between bands so it does not hang out beyond frame edge)

3. Choose one of the corners. With both hands, fold your Flowerhouse into a U shape like a giant soft shell taco, folding corner to opposite corner diagonally, as shown in figure B.

(helpful hint you will feel the tension of the spring steel this is ok)
4. As the top corner in your hands meets the diagonally opposite corner on the Ground as shown in figure C, pull or tuck the top corner back Under toward your feet, as shown in figure D.
(helpful hint as you pull or tuck top corner back UNDER toward your feet you will feel tension release as shown in figure D.)

5. Then fold the ring on your left side and the right on your right side down over center ring forming 3 rings as shown in figure E.
(helpful hint the goal is to form 3 equally sized rings)

6. This completes the folding of your Flowerhouse lay it on the ground and kneel or press extra air out that was trapped during folding process as shown in figure F.

7. Returning the greenhouse to storage bag works best by holding the folded greenhouse between your knees and then pulling the bag over it, rotating slightly to fit it, then pushing the unit in completely, so not to stress the zipper, as shown in figure G.

8. Now you can place the accessories in their storage bags and next to or between the folded greenhouse. Now Greenhouse can be easily stored.
(helpful hint it is recommended that the greenhouse is then stored out of direct sunlight)
